Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

It is noted that this application has been transferred to Examiner Huson from Examiner Yager. Examiner Huson has been advised that Examiner Yager proposed an oral Restriction Requirement to Applicant, and that Applicant orally elected Claims 2-12. However, upon further review of the application, Examiner Huson is withdrawing the aforementioned Restriction Requirement and has examined pending claims 1-16, as noted below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Farrell (U.S. Patent 4,038,006). Farrell show that it is known to have a preform for a container comprised of orientable plastics material (Column 1, lines 64-68; Column 2, lines 1-3) so that the resultant blown container will include a hollow handle (Figure 2, cross section of container in mold), the preform comprises a molded structure having a neck portion and an expandable portion below the neck, a hollow handle portion of orientable plastics material continually connected to the preform, wherein the resulting container is stretch blow molded (Figure 1: preform with handle in mold 14; expanded in mold 16; Figure 2; Column 3, lines 1-55; Column 4, lines 7-48; Column 5, lines 8-21).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 1791

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Farrell. Farrell discloses that there is room for a human hand between the handle and the container body and that the mold can be fashioned depending on the desired final contour of the handle (Column 5, lines 21-30), but he does not specifically disclose the claimed variations of the handle design. However, configuration is a matter of choice which a person of ordinary skill in the art would have found obvious absent persuasive evidence that the particular configuration of the claimed container was significant (MPEP 2144.04 (IV)(B)). Therefore, It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to form the handle to be connected at one end or both ends in order to satisfy particular customer demands as far as handle design.

Allowable Subject Matter

Claims 2-13 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record neither teaches nor suggests the claimed method of forming a preform and container, especially including the step of providing a flexible mandrel adapted for insertion into the handle portion of the injection molding cavity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MONICA A. HUSON whose telephone number is (571)272-1198. The examiner can normally be reached on Monday-Friday 7:00am-4:00pm.
